

MD SHALEEN

Data Analyst | SQL Developer | Power BI | Advanced Excel

shaleen085@gmail.com | +91-9798661239 | Kolkata, West Bengal

PROFESSIONAL SUMMARY

Entry-level Data Analyst and SQL Developer with hands-on experience analyzing structured datasets and solving business problems using SQL, Power BI, and Advanced Excel. Proficient in writing optimized SQL queries, performing data cleaning and transformation, and building interactive dashboards to generate actionable business insights. Completed 5 data analytics projects spanning e-commerce, healthcare, and sales domains, plus a challenge-based SQL internship demonstrating strong analytical thinking and problem-solving ability.

TECHNICAL SKILLS

Databases & SQL	SQL, MySQL, Relational Database Design, Normalization
SQL Concepts	INNER & LEFT JOINS, Subqueries, GROUP BY, HAVING, ORDER BY, CASE, Constraints, Indexing
BI & Analytics	Power BI, Power Query, DAX (Basics), Data Modeling, ETL Concepts
Excel & Tools	Advanced Excel (Pivot Tables, VLOOKUP, Charts), Google Sheets, MS Office Suite
Core Strengths	Data Cleaning, Query Optimization, Analytical Thinking, Business Insights, Report Building

INTERNSHIP EXPERIENCE

SQL Intern (Challenge-Based) | Ivy Professional School

Oct 2025 – Nov 2025

- Solved 20+ real-world business problems using structured SQL challenges across sales, customer, and performance datasets
- Wrote optimized SQL queries using JOINS, subqueries, GROUP BY, HAVING, and CASE statements to extract actionable insights
- Performed data cleaning and transformation to improve data accuracy and consistency for downstream reporting
- Generated analytical reports identifying sales trends, top customers, and performance benchmarks for business stakeholders
- Strengthened query optimization skills by reducing redundant logic and improving execution efficiency

PROJECTS

SQL Habit Tracker / Life RPG System | Tech Stack: MySQL

- Designed a normalized relational database with 5+ tables (users, habits, logs, progress) using primary and foreign key relationships
- Wrote analytical SQL queries to calculate habit streaks, completion rates, point accumulation, and weekly progress trends
- Implemented status tracking using logical flags and date-based analysis for identifying active vs. inactive habits
- Solved business-style questions: most consistent habits, top-performing users, and streak leaderboards

E-Commerce Analytics Project | Tech Stack: MySQL

- Designed and populated relational tables for Customers, Products, Orders, and Order Items with proper constraints

- Developed SQL queries to calculate total revenue, average order value (AOV), and monthly sales trends
- Identified top-selling products and categories using aggregation functions; performed city-wise and customer-wise revenue analysis
- Used JOINS, subqueries, GROUP BY, and WHERE clauses to answer 15+ business questions on high-value customers and growth areas

Healthcare Analytics Dashboard | *Tech Stack: Power BI, Power Query, DAX*

- Developed an interactive healthcare dashboard monitoring patient counts, department-wise performance, and treatment trends over time
- Cleaned and transformed raw healthcare data using Power Query to ensure accuracy and reporting consistency
- Built calculated measures and KPIs using DAX to support operational and management-level decision-making
- Designed dynamic dashboards with slicers and filters enabling drill-down analysis by department and time period

Sales Analysis Dashboard | *Tech Stack: SQL + Excel + Power BI*

- Cleaned and prepared raw sales data using SQL and Excel before loading into Power BI for visualization
- Built interactive dashboards with slicers, filters, and charts analyzing performance by region, product category, and time period

Student Database Management System | *Tech Stack: MySQL*

- Designed a normalized relational schema for student records with constraints ensuring data integrity
- Wrote SQL queries for filtering, grouping, and generating summary reports across student datasets

CERTIFICATIONS & TRAINING

Career Essentials in Data Analysis — Microsoft & LinkedIn	Aug 2024
Microsoft Power BI Data Analyst Training — Henry Harvin Education	Apr 2024
Data Analytics Certification (In Progress) — Advanced Excel, SQL, Power BI	Ongoing

EDUCATION

Bachelor of Commerce (B.Com) Lalit Narayan Mithila University, Darbhanga	2020 – 2023 63%
Senior Secondary (Class 12) C. High School, Samastipur BBOSE Board	2019 63%
Secondary (Class 10) Mother Pride Senior Secondary Public School CBSE Board	2017 CGPA: 9.2

LANGUAGES

English | Hindi
